

Keep on Climbing!

On the 27th November, 4 children from Year 5 and 6 went to Nene Leisure Centre to take part in an Indoor climbing experience. When we went rock climbing it was really fun but you also need to have a good grip if you are going to go. I would say it is very extreme and amazing, you might need to have a partner if you're climbing across the wall just in case you fall so your partner can catch or guide you to safety. Lots of people like rock climbing, sometimes when you're climbing you might fall. But never should people be sad because of it, since most people think they are destined to be a rock climber. Everyone can try to do their hardest and be great at rock climbing.
