

Year 1 Geography – UK Countries

What we already know:

I know about the natural world around me in my own immediate environment, including animals and plants

What's next?

Significant people: Florence Nightingale.
 Florence Nightingale was known as 'The Lady with the Lamp'. She helped care for soldiers in the Crimean war and set up the Nightingale School of Nurses after the war to teach others.

The Globe and the World Map

The Globe is a representation of our world that we live in.

The World Map is another representation of our world, but it is a flat, 2D picture.

There is more water on the earth than land.

The larger parts of the water is called the oceans.

I can locate the UK on the Globe and the World Map

The United Kingdom (UK)

The UK is made up of four different countries: England, Scotland, Wales and Northern Ireland.

The UK is made up of islands.

An island is a small piece of land that is completely surrounded by water.

There are land borders between England and Scotland; England and Wales.

You can move between England, Scotland and Wales by car, bus or train

I know the capital cities for each country. The capital city is the 'main' city in each country

Country	Capital City	Flag
England	London	
Scotland	Edinburgh	
Wales	Cardiff	
Northern Ireland	Belfast	

I know that a landmark is an object or feature of a town, city or place that is easily recognisable or famous

Being a Geographer

I know the four main points of a compass. North, East, South and West.
