

What we already know:

- We have learnt all about plants and trees. Plants have petals, a stem, leaves and roots. Trees have a trunk, branches, leaves and roots. We know a plant is a living thing that usually lives in soil. Some plants can be food.

Growing and Cooking

- Some fruit and vegetables can be grown for food.

- Farmers are people who grow crops to be used as food.
- Fruit is the part of a flowering plant that contains seeds.

- Vegetables are parts of plants that you can eat. Usually the stems, leaves and roots.

- Many plants have parts that humans can eat.
- Crops are plants that farmers grow to be eaten.

- Much of the food we eat comes from crops.

Seasonal Changes

There are four seasons in one year.

- The seasons are Spring, Summer, Autumn and Winter.
- Summer is usually the warmest season.
- There are the most daylight hours in summer and the nights are shorter.
- Many plants grow in Summer.
- There are more animals active in Summer.

- **winter** – the season after autumn and before spring

- **autumn** – the season after summer and before winter

- **spring** – the season after winter and before summer

- **summer** – the season after spring and before autumn

- **season** – one of four parts of the year

Summer is usually warmer than spring.

- Summer is normally the warmest season.
- There are more hours of daylight in summer and the nights are shortest.
- There are four seasons in one year.
- Winter is usually the coldest season.
- Summer is usually the warmest season.
- Some trees start to lose their leaves in autumn.
- Some trees lose all their leaves in winter.
- Plants begin to flower in spring.
